Hiking directions to the Big Belt Hawk Watch site:

From the parking area, hike south (up the hill) on a rough 4-wheel drive road, 1.4 miles (900 feet of vertical elevation gain) until you are almost to the communications tower.

When you arrive at the top "meadow", and the communications tower is just ahead of you and there are about 4 telephone poles - without wires - leading the way to/from the tower, make a right turn and walk down the meadow 200 yards, or so. You'll see the decoy great-horned owl on top of the pole in a dead tree. The observers will be just below the owl.

The observers' names are Ronan and Jeff.
